1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Property and Depreciation: Utility plant is recorded at cost. Maintenance and repair costs are charged to expense as incurred. Depreciation is provided on the straight-line method over the estimated useful lives of the assets, at rates prescribed by the PSCW.

The Company records customer contributions for plant construction as a current year reduction in utility plant additions.

(b) Revenue Recognition: In accordance with the rules the Company has filed with the PSCW, the Company accrues the amount of unbilled revenues related to gas service rendered to year-end, along with the corresponding purchased gas expense and related income tax effects.

The Company's filed rules permit the Company to pass on to its customers, subject to PSCW review, changes in purchased gas costs from its pipeline supplier. Other cost increases cannot be passed on to customers.

© Inventories: Merchandise, materials, supplies and fuel inventories are stated at the lower of cost (first-in, first-out method) or market.

(d) Other Assets: Investments are recorded at cost.

(e) Income Taxes and Investment Tax Credits: In accordance with approval received from the PSCW, the Company has applied for and received permission to change its year end for Federal and Wisconsin Income tax reporting to January 31, in order to file a consolidated Federal Income tax return with the other members of its consolidated group. The Company continues to report the PSCW on a December 31 year end. The Income tax provision reported in this annual report is based upon the tax that would be paid if the Company filed a separate Federal Income tax return. No significant differences exist between the provision and the amount the Company will pay as its share of the tax on the consolidated Federal return.

For financial reporting purposes, the Company defers investment tax credits and amortizes the tax benefits recognized over the estimated useful lives of the related asset.

NOTES TO FINANCIAL STATEMENTS (Continued)

The Company provides for deferred income taxes in recognition of all significant temporary differences for items reported for tax purposes in periods different than for financial statements purposes. These primarily result from differences in depreciation methods.

(f) Revenue and Rate Matters: The Company accrues refunds for excess revenues collected due to reductions in previously approved purchased gas adjustments and for cash refunds received by the Company from its supplier. Such refunds are refunded to customers in cash or by crediting their bills.

(g) Employee Benefits: The Company participates in a 401(k) profit sharing plan of a controlled group of corporations covering substantially all employees.

(h) Self Insurance: The Company's group health insurance coverage includes Company self-insurance participation. The Company has accrued a liability for those claims which have been made subsequent to year-end which pertain to the reporting periods. However, no provision is made in the financial statements for Company participation in costs not yet claimed or identified.

OPERATING REVENUES FROM NATURAL GAS UTILITY

1. Report data by rate schedule (including unbilled revenues and therms), classified between space heating and non-space heating customers. Customer counts are based on the average number of meters in service - using 12 month end figures. Where meters are combined for billing purposes, each combined group of meters counts as one customer.
2. For industrial interruptible sales, report data by priority of interruption.
3. Report all data for transportation customers even if they are already included in Accounts 480-484. Classify these by rate schedule in the same detail as reported in Accounts 480-484.
4. For the remaining other operating revenues, report details of major items and then group the remaining items in each account. Report the name of lessee and description of property for major items of rent revenue.
